

The Antibody Society: Our Mission and Current Initiatives

Paul J. Carter, Ph.D.
Vice President, The Antibody Society

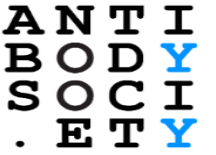

**The Antibody Society Symposium
FOCIS Annual Meeting
San Francisco, CA, 20 June 2018**

The Antibody Society: Introduction and Mission

- We are an international non-profit association representing individuals and organizations involved in antibody R&D
- We engage in activities to broadly benefit our members and the antibody R&D field
 - Specific initiatives, education and publishing, contribute scientific content and financial support to various antibody-related conferences
- We were incorporated in 2007 and currently have 1,400+ members

The Antibody Society: Initiatives

- We work closely with the WHO, trade groups and colleagues across the antibody community to resolve the INN source infix issue*
- We track metrics for antibody drug development including regulatory approvals
- We recently incorporated the Adaptive Immune Receptor Repertoire Community to help establish standards for next-generation sequencing data
- For more details please visit our website: www.antibodysociety.org
