

The Antibody Society presents:

**Antibody Validation
Webinar Series**

WEBINAR 8: Protein Arrays and Mass Spectrometry

Moderator: **Dr. Simon Goodman**, The Antibody Society

Speakers: **Dr. Mike Taussig**, Cambridge Protein Arrays and **Dr. Fridtjof Lund-Johansen**, Oslo University Hospital

First Webcast: February 5, 2020

Now available On Demand

All webinar registration links are available in our [Learning Center](#)

Questions and Answers from the live Webcast on February 5, 2020

Question	Answer
Mike, do you have arrays dedicated to specific and conserved protein families?	Thank you for your question! This is possible but would require a special request.
Fridtjof, do you see correlation between levels of off-target cross-reactivities from antibodies to members of conserved protein families?	Good question! We do have some IP-MS data showing exactly that.
When is the next episode?	SG response: Episode #9 , in which Dr. Andrew Bradbury suggests ways out of the validation maze by rigorous molecular identification of recombinant tool antibodies, will be broadcast February 12, 2020, 10am ET / 16:00 CET .

All episodes in this webinar series will be made On Demand after the initial broadcast.
