

Minutes of IARC meeting 98, April 19th, 2022

In attendance: Ayelet Peres, Gur Yaari, William Lees, Mats Ohlin, James Heather (guest)

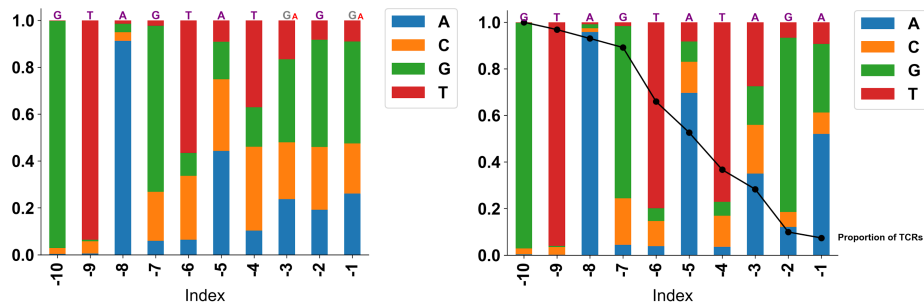

1. Draft report to AIRR-C Meeting VI

Discussion

2. Approach to inference of the 3'-end

Analysis (JH) of 10 last bases of sequences associated to TRBV19 from a deeply sequenced repertoire as plotting using all data or in a consensus-trimmed manner (only plotting bases from sequences in which the preceding calls match the consensus, to eliminate the contaminating effects of any receptors that have presumably deleted bases past that position).

Discussion on the ability to use such analysis in the affirmation process.

3. Next meeting

May 9th, 2022 at 10.00 UTC
